

# A PuzzleHR Case Study:

## Dayforce

### Maximizing your Investment

- This dynamic global leader in power test solutions leaned on PuzzleHR to maximize their investment in Dayforce. The client's employees lacked the time to manage payroll, optimize systems, and focus on managing their people.
- The relationship began as a 6-month HR support engagement for assistance optimizing their Dayforce software but soon transformed into a full Dayforce partnership.

**PuzzleHR stepped in to manage the client's payroll, ensuring payroll is processed on time and error-free, and serves as their Dayforce System Administrator.**

- We are also working with the client to deploy new modules as necessary and assist with their new API integration so they can make the most of their Dayforce investment while focusing on their products and people.
